Charles Lindsey

Sam E. Sawyer has made his home in Elba since 1931. He was born in Enterprise and educated in the Enterprise school system. He is married to the former Lorraine Dorsey and they have one daughter, Lela Ann (Mrs. Marilyn Dyess) of Montgomery.

Upon finishing high school, Sawyer went to Washington D. C. where he worked in a drug store for one year. He recalls working 60 hours a week and glad to get the \$18 a week they paid in "the old days."

After coming to Elba and establishing Sawyer Candy Co., Sawyer has become active in all parts of the community and social life. He is a past president of the Rotary Club and the Lions Club, director of the Peoples Bank of Elba and a director of Pake - Dyess Sporting Goods in Montgomery.

John M. Garrett Jr., is 62 years old and a native of Elba. He is one of three children and finished Elba High School in 1923 and later graduated from Auburn with a degree in agriculture.

His first job was with Purina Mills in Saint Louis, Mo. and later he worked with Vick Chemical Co. as a salesman, supervisor and later as district manager. In 1942, Garrett joined the Army Air Corp for three and 1/2 years, and attended Officer Training School in Miami and later spent one year in Europe. He is a retired Lt. Colonel in the Air Force Reserve.

In 1945 he opened a Ford dealership in Elba which he operated for several years. He has been retired from business for several years.

Charles W. Lindsey was born in Elba on November 11, 1918, the son of Jordan and Gussie Mae Lindsey. He was educated in the Elba school system and at Auburn University.

In 1940 he joined the U. S. Navy and served on the USS Enterprise, USS Saratoga and on Guadalcanal as a fighter pilot. He is married to the former Dorothy Mostle and they have two children, Scotty, age 21, presently in the Navy aboard the Destroyer USS Goodrich and a daughter, Debbie, a student at Elba High School.

Lindsey operates Lindsey Appliance Company in Elba.

The band is under the direction of Mr. Joey Rudd, once a resident of Elba. Usual Saturday schedules of receipt and dispatches will be maintained.

Court Of Appeals Gives OK To Co-op Plant

The U. S. Fifth Circuit Court of Appeals has denied an application for a rehearing by Alabama Power Company on its court battle to halt the construction of a generating plant on the Tombigbee River by Alabama Electric Cooperative, Inc.

The entire court, in a unanimous decision, denied the Alabama Power Company's effort to seek a rehearing on a decision by the court earlier this spring upholding Alabama Electric's right to build the plant and to enter into 35 year power supply contracts with the rural distribution cooperatives it serves.

The Fifth Circuit Court decision was handed down on April 24, 1968, in a lower court on the case which has been pending since 1962. The generating plant near Jackson which is the subject of the court battle is nearly completed and is expected to go into operation this fall.

Revival Planned At Westside Next Week

Revival services will begin at the Westside Baptist Church of Elba, Sunday, July 28 through Friday, August 2.

Dr. James E. Southernland, President of Baptist Bible Institute, Graceville, Florida will be the evangelist. Milton Lites, Minister of Music, Elba First Baptist Church, will lead the singing.

Dr. Southernland is a native of Florida. He holds degrees from Stetson University and both the Southern Baptist and the Southern Baptist Theological Seminary. He has held pastoral duties in Florida and Mississippi.

Lites is a native of Louisiana Tech and Southwest Theological Seminary. He holds degrees from Louisiana Tech and Southwest Theological Seminary. He holds degrees from Louisiana Tech and Southwest Theological Seminary.

Coffee County Vacationers Are Going To Georgia

Approximately 315 Coffee County residents are expected to attend the Georgia Vacationers Are Going To Georgia convention, which will be held in the month of June according to figures released by Great Southwest Corporation, owner-operator of Six Flags Over Georgia.

Over 41,973 Alabamians visited Six Flags Over Georgia during the month of June.

Disabled Widows Can Get On Social Security

If you are disabled and the widow of a man who was insured under social security at his death, you may be able to get monthly cash payments. Before the recent changes, a widow could get monthly checks before age 60 only if she had in her care a child entitled to benefits on her husband's record. Now, a widow who is unable to work because of severe disability may be able to get monthly checks as early as age 50.

A woman who was divorced from her husband 20 years or more may also be eligible for disabled widow's benefits if she was contributing or under a court order to contribute to her support at the time of his death.

The people at the Dothan Social Security Office will be glad to help you apply for these benefits and tell you what you need with your claim. The office is located in the Federal Building, 100 West Troy Street and is open from 8:45 a.m. to 5:00 p.m. Monday through Friday. A special time, from 9:00 a.m. to 12:00 noon on Saturdays is available for those who cannot come in at any other time.

Area Skies Most Crowded In World

Skies over Southeast Alabama continue to be about the most congested in the world, in good weather and bad, due to flight training at the Army Aviation School.

This was proved again last week when the Army Radar Approach Course (ARAC) at Cairns Army Airfield set two new records in handling aircraft instrument operations.

ARAC, which controls military and civil air traffic in Southeast Alabama, broke a seven-month old record on Monday when it handled 688 operations in a 12-hour period. The new mark lasted only until Tuesday when the busy air traffic controllers logged 695 operations. By the week's end, ARAC handled a total of 8,200 operations, an average of 640 for each training day.

The Ft. Rucker facility controls air traffic in and out of Cairns Field, Lowndes County, and Hanceville Army Heliports, and the Dothan Municipal Airport.

Tooth Decay End Is Called Likely Within Ten Years, Expert Says

Tooth decay, a disease that affects at least 98 per cent of Americans may be preventable within 10 years, the director of the National Institute of Dental Research said recently.

Dr. Ronald J. Gibbons, one of three scientists conducting this research explained that an enzyme, Dextranase, has been initially successful with animals in experiments to kill the microbes that attack the teeth and create cavities.

Several research groups are trying to find a comparable key to the plaque that is formed by another group of bacteria, called diphtheroids, which are thought to be a major factor in periodontal disease and decay at the base and roots of teeth.

PEANUT EXPERTS PREFER POLYRAM

You get more peanuts per acre with Polyram for two reasons. First, Polyram wards off the major disease of peanuts, leafspot. So more peanuts survive to maturity. Secondly, Polyram is safe for plants and safe to work with. Polyram protected peanuts thrive all season to produce high yields of sound mature kernels.

Use Polyram and get ready to harvest more peanuts this year. See your dealer for supplies.

DANKERS CLINIC
I attended the Dankers Agricultural Clinic at the Wiregrass Experiment Station in Headland a few days ago with Joe Brock of the Federal Land Bank and Fred Clark, vice president, and Oscar Vaughan, president of the Elba Exchange Bank. The tour of some of the beef cattle, peanut and truck crops experiments was very interesting and then we met in the auditorium for a full discussion.

J. R. Strickland, one of the officials of the Dankers Association, commented that it used to be that farmers would borrow money in the spring and repay in the fall. A lot of times now it is becoming more and more common for folks to borrow in the fall and pay back in the spring. This points out our changing agriculture and a shift from reliance on row crops to livestock.

THE AUBURN RATION
Dr. Brady Anthony, one of the top nutritionists in the south, outlined Auburn's feeding formula for fattening cattle which has been used for several years and has been successful. The ration consists of corn, 64%; Coastal hay, 20%; molasses, 10%; and the Auburn 65 concentrate, 6%.

Dr. Anthony pointed out that for people who are feeding a few cattle or are just getting into the business, research shows that regular shelled corn with a liquid supplement is giving excellent results. The advantage of this according to Anthony is low investment in feed processing equipment.

ANIMAL AGRICULTURE
Two meetings were held this past Thursday night by growers of two different commodities in Coffee County. These were the hog growers meeting held at the Enterprise High School auditorium and the Hog Producers Association meeting held at the Elba Elementary School. Both of these industries are expanding in Coffee County. Both offer a great promise for growth in the immediate years ahead. Over 250 folks attended the hog growers meeting and over 125 attended the hog producers meeting. These industries coupled with our beef cattle and dairy businesses in Coffee County point to the importance of livestock in this county.

DISTRICT JUDGING
One hundred twenty-five 4-H Club boys and girls from 17 southeast Alabama counties had a great day Thursday in their judging contest events. District winners were selected for competition in the state.

County 4-H Girls Attending Auburn Meeting

Four Coffee County 4-H Club girls are attending District 4-H Awards Program in Auburn. Two girls are entering the Dairy Foods Contest. They are Rhonda Killingsworth and Sandra Bowman. Rhonda is giving a demonstration in the senior division and Sandra in the Junior. Both girls are making milk drinks.

The other two 4-H girls attending are Diane Middleton and Zella Bragg. Diane is participating in the dress revue and Zella in the Public Speaking. Diane and Sandra are from the Mt. Pleasant community, Zella and Rhonda are from the New Hope community.

Auburn, says that artificial curing involves two major steps. First is removing excess moisture and second is maintaining the quality of the peanuts. Every peanut grower realizes that if curing effort isn't done, it can lower quality. Too much heat and drying too fast will cause the peanuts to spread and the skin to slit. It is best to dry at the slowest rate possible. Watson reminds growers to never remove more than 1 1/2% moisture per hour and to never reduce the peanuts below 8%.

TOURS
Coffee County farmers will be interested in two field days which have been scheduled at the Wiregrass Experiment sub-station at Headland. The first is the annual farmers field crops day set for Wednesday, August 7, beginning at 1:00 p.m. at the sub-station. Research to be discussed includes disease and weed control in peanuts as well as work being done on row spacing and new varieties. The making of Coastal bermudagrass silage, corn variety research and results on mechanical tomato harvesting and the production of fruits will be as on Tuesday, August 20 a special production meeting for farmers will be held. This meeting will last all day beginning at 9:30. I know a lot of farmers will be interested. Why don't you make plans to go with some of your neighbors and attend these meetings?

Direct Distance Dialing has come to the phones in ELBA. You'll find it in new phones, old phones, pink phones, blue phones, wall phones and hall phones. If it rings and you can talk through it you can now make a long distance station-to-station call as easy as ringing up your next door neighbor.

First dial 1. Then the area code of the city you're calling if it is different from your own area code. (You'll find that number in your telephone directory.) And finally dial the number of the party you're calling. That's all there is to it. It's like having your own private Hot Line.
